

SOLID WOOD FLOORING LOOKBOOK

JUNCKERS

Walking on Danish design

2 STRIP WOODEN FLOORING

The 2 strip Board Hardwood floors are designed as a series of individually chosen wooden strips, laid in a staggered pattern.

Whether you like a clean, modern or classic style wooden floor, or a dark, warm colour, Junckers has the floor for you.

A solid hardwood floor from Junckers is an investment that is likely to add permanent value to any building, but most importantly, it should enhance your space and everyday life.

The following pages are filled with an inspiring choice of first-class hardwoods.

Sustainability and environmental issues were hardly discussed in the 1930's when the young forester Flemming Juncker was looking for ways to use and preserve one of our most valuable assets; the forests. When he established the company under his own name he put his ideas into practice and we are still benefiting from this today.

JUNCKERS UTILISES 100% OF THE FORESTED TIMBER

Junckers is an energy-intensive industry using substantial volumes of energy for the drying and processing of wood. However residual wood (sawdust, wood chips, saw-cut log ends and other residual wood from the production) is supplied to a wood-fired power plant, which in return supplies electricity to Junckers and the Danish national electricity grid.

JUNCKERS IS A CO₂ POSITIVE COMPANY

As wood is considered to be a CO₂ neutral material, and because Junckers generates more energy than the business itself can consume, the surplus energy contained in the waste wood is used to produce "CO₂ Neutral" electricity, making Junckers a carbon positive company.

CERTIFIED TIMBER PEFC™ AND FSC®

At Junckers, we believe in sustainability and we support initiatives that improve environmental awareness.

We hold a Chain of Custody PEFC™ and FSC® certificate. A Chain of Custody certificate enables tracking of the wood from the finished floor back to the forest. PEFC™ and FSC® are organisations that work globally to ensure legal and well managed foresting to protect nature, wildlife, and people.

HEALTHY AND DURABLE FLOORING

A declaration of performance forms the basis for the CE marking, which accurately shows how specific legal requirements are met. For example, this is applicable to fire resistance, degassing, strength, friction, etc.

PRODUCT QUALITY

Junckers product quality management system forms the basis of the company's CE marking scheme, according to EN 14342: 2005 + A1: 2008, EN 14904: 2006 and EU Guidance Paper B and D for CE marking. The quality system complies with the ISO 9000 series, but is not monitored by a third party. The system includes employees, production, administrative processes and resources essential to meet the company's quality goals.

CE – DECLARATION OF PERFORMANCE

Junckers' floors are CE marked, which means that the floors must comply with certain EU standards in relation to safety, the environment and health.

ISO 14001 – ENVIRONMENTAL MANAGEMENT

Junckers is certified according to ISO 14001. Additionally, the environmental management system comprises areas such as working environment (OHSAS 18001), as well as energy safety in connection with electrical work (SKS).

SUSTAINABLE CONSTRUCTION LEED, BREEAM AND DGNB

Junckers has identified ways in which we can contribute to three leading voluntary schemes for sustainable building. This includes areas such as economics, indoor climate and use of materials. This enables us to provide the appropriate information which auditors and assessors will often need for certification of different types of building projects.

BRE GLOBAL GREEN GUIDE

Junckers 22 mm solid hardwood flooring boards correspond to the BRE Global Green Guide online generic specification for hard floor finishes, Element number 821580002, which achieves a summary rating of A+ within commercial buildings.

INDOOR CLIMATE WE CARE ABOUT THE PLAYERS HEALTH

All Junckers wood floors, our water based lacquers and indoor oil products have received the Danish Indoor Climate labelling. A product with this labelling has undergone extensive degassing and odour tests. This ensures that there are no chemical substances in the floor which adversely affect the air quality in the room.
